- Implemented mobile-first designs for seamless user experiences

Boost360: (Knockout Js)

- Maintained Boost360 legacy project using Knockout.js
- Optimized data-binding performance for improved platform responsiveness
- Integrated new features seamlessly with existing codebase
- Spearheaded critical maintenance of Boost360 platform serving 10,000+ daily users

BizHq: (Angular, Tailwind Css)

- Played a significant role in the development of Bizhq, an Angular-based project, where Incontributed to the architecture, UI design, and delivery of a client-focused application
- Developed reusable Angular components and crafted responsive layouts with Tailwind CSS, resulting in a 30% reduction in development time for new features and improved application scalability across diverse platforms
- Improved customer satisfaction by creating user-focused designs aligned with business goals and client expectations

Support Dashboard: (React, Bootstrap)

- Refactored legacy React codebase, reducing technical debt by 40%
- Developed new features while maintaining 99% uptime

Education

Cluster University of Srinagar
Bachelor in Computer Applications (BCA)
Graduation Year: 2021
GPA: 7.95

Certifications
- Aptech - Aptech Certified Web Developer — (2018)
- Ineuron - Full Stack Javascript Developer — (2023)

Projects

Blog Web App
- Engineered a scalable blogging platform supporting 2,000+ active users with 99.9
- Intergrated JWT authentication and role-based access control, ensuring secure content management
- Integrated rich text editor with markdown support, increasing post creation efficiency by 30%

    GitHub — Website

Mystry Messaging App
- Built an anonymous messaging app with Next.js and MongoDB that generates unique URLs for recipients to collect messages
- Created a secure dashboard with ShadCN styling where recipients can view all their received anonymous messages   GitHub — Website
